FIRST CIRCULAR

4th International FEED SAFETY Conference - Methods and Challenges -

11 - 13 September 2012
Beijing, The People's Republic of China

INVITATION

Dear colleague,

It is our pleasure to invite you to the 4th International FEED SAFETY Conference. During the past decade, due to the BSE and dioxin crises and other feed related incidents, the crucial role of feed safety in food safety has become more and more obvious. This led to the enforcement of regulations, increased activities in the feed sector to safeguard feed safety, establishment of risk assessment systems and international cooperation to improve detection capabilities.

The 4th International FEED SAFETY Conference is organized to present the state of the art and to discuss future challenges. This conference is organized by the China Agricultural University (CAU), Beijing, the People's Republic of China in collaboration with the Walloon Agricultural Research Centre (CRA-W), Gembloux, Belgium, the Institute of Food Safety (RIKILT), Wageningen, The Netherlands and the Queen's University of Belfast (QUB), Belfast, UK. Former FEED SAFETY Conferences were organized in 2004, 2007 in Namur (Belgium) and in 2009 in Wageningen (The Netherlands) in the framework of different EC projects.

We hope to welcome you in September 2012 and we look forward to a great conference in Beijing.

Scope

The following topics will be covered:

- Recent advances in feed analysis
- Impact of feed on food safety
- Risk assessment
- Traceability
- Legislation framework
- Future challenges in feed safety

The scientific program will address areas such as processed animal proteins, NPN and organic contaminants (dioxins, PCB's, pesticides), feed additives, banned substances, heavy metals, mycotoxins, plant toxins, veterinary drugs, and GMO's. Results of recent international RTD projects will be presented.
